Contents

1 Initial Validation Plots **2**
1.1 $Z \to ee\gamma$ channel 2
1.2 $Z \to \mu\mu\gamma$ channel 2

2 Closure Test — 5% Distortion ($\delta = 0.05$) **3**

3 Closure Test — 3% Distortion ($\delta = 0.03$) **7**

4 Closure Test — 1% Distortion ($\delta = 0.01$) **11**

1 Initial Validation Plots

These plots validate the cell-level recomputation of the three shower shape variables (R_η, R_ϕ, $w_{\eta\,2}$) against the stored values in the ntuples. Each figure shows three normalised distributions: **Unfudged/stored** (blue) — the original MC stored values; **Fudged/stored** (red) — the "fudged" stored values; and **Computed from cells** (green, dashed) — values recomputed from the 7×11 Layer-2 cell energies. The lower panel displays the ratio to the Unfudged baseline. Agreement between the blue and green curves confirms correct cell-level recomputation.

1.1 $Z \to ee\gamma$ channel

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 1: Shower shape validation for the $Z \to ee\gamma$ channel. Normalised distributions of all three variables comparing stored (Unfudged, Fudged) and cell-recomputed values. The ratio panel confirms that the cell-level recomputation reproduces the stored values.

1.2 $Z \to \mu\mu\gamma$ channel

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 2: Shower shape validation for the $Z \to \mu\mu\gamma$ channel. Same format as fig. 1. The $Z \to \mu\mu\gamma$ sample provides an independent cross-check of the cell-level recomputation.

2 Closure Test — 5% Distortion ($\delta = 0.05$)

Closure test results with a 5% uniform distortion applied to all Layer-2 cell energies. Each figure shows one $|\eta|$ bin with all three shower shape variables side by side. Upper panels: normalised distributions of pseudo-data, uncorrected MC, Method 1 (flat shift), and Method 2 (TProfile). Lower panels: ratio to pseudo-data.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 3: $|\eta| \in [0.00,\ 0.20)$, $\delta = 0.05$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 4: $|\eta| \in [0.20,\ 0.40)$, $\delta = 0.05$.

(a) R_η (b) R_ϕ (c) $w_{\eta 2}$

Figure 5: $|\eta| \in [0.40, 0.60)$, $\delta = 0.05$.

(a) R_η (b) R_ϕ (c) $w_{\eta 2}$

Figure 6: $|\eta| \in [0.60, 0.80)$, $\delta = 0.05$.

(a) R_η (b) R_ϕ (c) $w_{\eta 2}$

Figure 7: $|\eta| \in [0.80, 1.00)$, $\delta = 0.05$.

(a) R_η (b) R_ϕ (c) $w_{\eta 2}$

Figure 8: $|\eta| \in [1.00, 1.20)$, $\delta = 0.05$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 9: $|\eta| \in [1.20,\ 1.30)$, $\delta = 0.05$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 10: $|\eta| \in [1.30,\ 1.37)$, $\delta = 0.05$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 11: $|\eta| \in [1.52,\ 1.60)$, $\delta = 0.05$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 12: $|\eta| \in [1.60,\ 1.80)$, $\delta = 0.05$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 13: $|\eta| \in [1.80,\ 2.00)$, $\delta = 0.05$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 14: $|\eta| \in [2.00,\ 2.20)$, $\delta = 0.05$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 15: $|\eta| \in [2.20,\ 2.40)$, $\delta = 0.05$.

3 Closure Test — 3% Distortion ($\delta = 0.03$)

Closure test results with a 3% uniform distortion. Same format as section 2.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 16: $|\eta| \in [0.00,\, 0.20)$, $\delta = 0.03$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 17: $|\eta| \in [0.20,\, 0.40)$, $\delta = 0.03$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 18: $|\eta| \in [0.40,\ 0.60)$, $\delta = 0.03$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 19: $|\eta| \in [0.60,\ 0.80)$, $\delta = 0.03$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 20: $|\eta| \in [0.80,\ 1.00)$, $\delta = 0.03$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 21: $|\eta| \in [1.00,\ 1.20)$, $\delta = 0.03$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 22: $|\eta| \in [1.20,\ 1.30)$, $\delta = 0.03$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 23: $|\eta| \in [1.30,\ 1.37)$, $\delta = 0.03$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 24: $|\eta| \in [1.52,\ 1.60)$, $\delta = 0.03$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 25: $|\eta| \in [1.60,\ 1.80)$, $\delta = 0.03$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 26: $|\eta| \in [1.80,\ 2.00)$, $\delta = 0.03$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 27: $|\eta| \in [2.00,\ 2.20)$, $\delta = 0.03$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 28: $|\eta| \in [2.20,\ 2.40)$, $\delta = 0.03$.

4 Closure Test — 1% Distortion ($\delta = 0.01$)

Closure test results with a 1% uniform distortion. Same format as section 2.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 29: $|\eta| \in [0.00,\, 0.20)$, $\delta = 0.01$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 30: $|\eta| \in [0.20,\, 0.40)$, $\delta = 0.01$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 31: $|\eta| \in [0.40,\ 0.60)$, $\delta = 0.01$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 32: $|\eta| \in [0.60,\ 0.80)$, $\delta = 0.01$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 33: $|\eta| \in [0.80,\ 1.00)$, $\delta = 0.01$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 34: $|\eta| \in [1.00,\ 1.20)$, $\delta = 0.01$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 35: $|\eta| \in [1.20,\ 1.30)$, $\delta = 0.01$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 36: $|\eta| \in [1.30,\ 1.37)$, $\delta = 0.01$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 37: $|\eta| \in [1.52,\ 1.60)$, $\delta = 0.01$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 38: $|\eta| \in [1.60,\ 1.80)$, $\delta = 0.01$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 39: $|\eta| \in [1.80,\ 2.00)$, $\delta = 0.01$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 40: $|\eta| \in [2.00,\ 2.20)$, $\delta = 0.01$.

(a) R_η (b) R_ϕ (c) $w_{\eta\,2}$

Figure 41: $|\eta| \in [2.20,\ 2.40)$, $\delta = 0.01$.
